

Lorain County Community College's Sensor System Center of Excellence \$1.5 million Fund for the Improvement of Post-Secondary Education-

The Sensor System Center of Excellence will enhance Lorain County Community College's economic development, educational and entrepreneurial programs' ability to develop the businesses and employees that will help revitalize the economy in Northern Ohio.

This project will upgrade the technological capabilities of the Great Lakes Innovation and Development Enterprise (GLIDE), Micro-Electro-Mechanical Systems (MEMS) Center of Excellence, and the Innovation Fund of the LCCC Foundation – the core elements of the Sensor Center.

This project will provide lab space and equipment for student researchers and LCCC's partners at the Center.

The entity to receive funding for this project is: The Family Promise, Inc 71 Summit Avenue Summit New Jersey 07901

The Nursing Technology Project: Lourdes College Ohio \$700,000 Health Resources and Services Administration (HRSA) Health Facilities Construction and Equipment-

□

The Nursing Technology Project will strengthen the education of students and provide them with a competitive edge in the workforce.

The investment in technology, instructional resources, and equipment upgrades for the nursing program will build the capacity of Lourdes College faculty and provide students with a comprehensive nurse education experience.

In return, Lourdes is able to address nursing shortages (and nurse faculty shortage) by training primary healthcare providers for the northwest Ohio community.

Nintey-Four percent of Lourdes College graduates work, live and volunteer in the community

ProMedica Health Systems Telemedicine Infrastructure: \$800,000 from HRSA Telehealth and Health Information- Will broaden Electronic Medical Record (EMR) capability and availability by building on existing infrastructure and adding new components over three years and, expanding electronic access to eight hospitals and nearly 3,000 physicians throughout 24 Ohio counties. This project will ensure that a large quadrant of our state will be able to comply with the requirement to implement EMRs nationwide by 2015.

The entity to receive funding for this project is: ProMedica Health System, 2121 Hughes Dr., Toledo, OH 43606

St. Vincent & ProMedica Health Systems, Urban Nutrition: \$300,000 from Health Resources and Services Administration- As Northwestern Ohio's largest non-profit hospital systems, this project will connect the patient populations with farmers market resources and a regional sustainable food system. With its expansive patient population, this project will connect in and outpatient populations with local food systems to combat obesity and poor food access among its low-income populations.

The entity to receive funding for this project is: St. Vincent Mercy Medical Center, 2213 Cherry St, Toledo, OH 43608

Bay Park Community Hospital Women's Services Expansion Project \$414,000 from Health Resources and Services Administration, Facilities

Bay Park Community Hospital Women's Service Project is an expansion of a successful midwifery practice in Ottawa County. The addition of diagnostic and laboratory services will provide one stop access and meet the total health care needs of women, facilitating early identification of diseases that result in timely intervention and referral and improved health outcomes. The project will take an initial capital investment of \$414,000 for digital mammography, relocation of a dexa scan machine, and medical and office furnishings. The full expense base includes staffing expenses, program services and facility expenses.

The entity to receive funding for this project is: ProMedica Health System, 2121 Hughes Dr., Toledo, OH 43606

Living Learning Lab \$82,500 from Centers for Disease Control & Prevention, Public Health Improvement
Living Learning Lab is a

collaboration with ProMedica, WGTE and Toledo Botanical Garden to demonstrate the living link between the garden, kitchen and table.

The outcomes will include 1) establishment of studio kitchen and outdoor garden at WGTE; 2) development of K-8 curriculum using the studio kitchen and outdoor garden; and 3) broadcast of concentrated/intensive educational programming to combat childhood obesity.

The entity to receive funding for this project is: ProMedica Health System, 2121 Hughes Dr., Toledo, OH 43606

Textile Commercialization & Demonstration Program Northwest Ohio Area Office on Aging \$300,000 from Department of Labor Workforce Investment Act This textile and business enterprise program will use retraining models to highlight opportunities for workers seeking to develop new technical and marketing skills as these workers attempt to enter the workforce.

The entity to receive funding for this project is: Northwest Ohio Area Office on Aging , 2155 Arlington Ave, Toledo, Ohio 43609

Kidney Transplant Program, University of Toledo \$750,000 from Centers for Disease Control This outreach program will create more living donor kidney transplants by helping patients with kidney failure who have willing, but incompatible living kidney donors to swap donors with other pairs in order to overcome incompatibility. The center will serve as a national clearing house for increasing kidney donations.

The entity to receive funding for this project is: University of Toledo, 2801 W. Bancroft, Toledo, OH 43606

Toledo GROWs, Environmental Education Program: \$300,000 from Fund for the Improvement of Education- Working with Toledo Public Schools faculty, members of the University of Toledo ecology department, Lucas Soil and Water educational staff, landscape architects and other partners, students will study plant growth with a focus on the distinct ecological circumstances in the urban environment. With over 30 million trees destroyed in the Midwestern urban landscape by emerald ash borer, this program will provide training on methods of replanting to refill the urban landscape with a variety of fruit-bearing and ornamental trees.

The entity to receive funding for this project is: Toledo GROWs, 5403 Elmer Dr., Toledo, OH, 43615

Toledo Public Schools Nutrition Education: \$250,000 from Fund for the Improvement of Education

to expand the Earth to Table program to Toledo Public Schools. The Earth to Table science curriculum is a hands-on five week program designed to meet the state science standards for fourth grade and to teach students about the plant growth cycle, sustainable agriculture and healthy eating choices. The goal of this program is to excite students about science, the condition of the ecosystem, and their health.

The entity to receive funding for this project is: Toledo Public Schools, 420 E. Manhattan Blvd, Toledo, OH, 43608

The University Of Toledo, Center For Excellence in Autism: \$500,000 from Centers for Disease Control-

This project will focus on the provision of a medical home for children and adults with autism and developmental disabilities that will include the capacity to identify, diagnose, treat, and coordinate services for these disorders. Funding for this project will support a psychologist, applied behavior analysts, therapists, and a developmental/behavioral pediatrician to provide those important services. The completed project will result in professionals available to provide diagnostic and treatment services to children and adults with autism and developmental disabilities.

The project will serve all individuals in need in the region.
